Projects

Phishing Detection through Hybrid learning

Kadapa

2025

Short summary of your work

- Led a team of five in developing a phishing URL detection system using machine learning, implementing advanced classification models for cybersecurity.
- Utilized Decision Tree, Random Forest, Naïve Bayes, Gradient Boosting, KNN, SVC, and a hybrid LSD model (LR+SVC+DT) with soft and hard voting for phishing detection.
- Integrated Canopy Feature Selection, Cross-Validation, and Grid Search for hyperparameter tuning, enhancing model efficiency and accuracy.
- Achieved superior phishing detection accuracy through comparative analysis using precision, recall, F1-score, and specificity metrics.

Technical Skills

Languages: Python • SQL • C • HTML

Developer Tools: VS Code • PyCharm

Technologies/Frameworks: GitHub • Django • Pandas • Numpy • Machine Learning

Leadership / Extracurricular

Department Association Activities(DAA)

Student coordinator

04/2024

- Organized and managed 10 events /workshops/seminars,coordinating logistics, schedules, promotions, and participation engagement.
- Monitored and managed event budgets to ensure efficient use of resources

Hobbies

★ Dancing

Dancing always used to be my favourite hobby

★ Listening Horror stories

To get relaxed or to stay focused i spend my time listening horror stories

★ Singing

My biggest therapy for solving any mental issues is singing and it has been my daily hobby
